

## Measuring For Roman Blinds

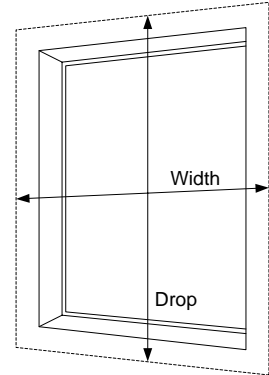

We will make your roman blinds to the measurements and specification you give below:

### Choose blind position:

Inside recess

Outside recess

<b>Recess Width:</b>	cm - 1cm clearance=	cm
<b>Recess Drop:</b>	cm + 1cm shrinkage allowance=	cm

<b>Width:</b>	cm
<b>Drop:</b>	cm

### GUIDANCE WHEN MEASURING

#### Inside recess:

- Carefully measure (in cm), the width and drop of the recess – do this in several places to allow for any slight variation or irregularity in your window. Use the **narrowest** of the measurements to fill in the boxes above and calculate final measurements
- Make sure the recess your blind is going into is not obstructed in any way so the blind can hang freely when fully extended

#### Outside recess:

- Decide how far you want the fabric to overlap the window on all sides
- Carefully measure (in cm) the finished width and drop you require

Please tick the required option below:

**Lining:**      Ivory     Pearl     Ecu      White     Other: \_\_\_\_\_

**Interlining:**  No      Acrylic    Domette    Bump     Blackout  
 Other: \_\_\_\_\_
